The morth simulder of Con-mar.anna Mill social by Indicates on the cap as relatively good direction forest, not completely altered.

195h Guan

In patch of woods at head of south branch of Pago River all large trees look dead, as though at some tipe there had been a fire.

Flate south of Talorofo Eng have extensive coccurt plantations.

Small lakes in Bogya limestone area are surrounded by belts of reads.

South of Orote Por. in most of the flat valley rottoms are traces of old rice patches in the marshland. Marked by rectangular pattern. Apparently date from Japanese occupation.

In Naval Magazine area are patches of Leucheum. On sust side of Mt. Leulan a fairly large

re-J march.

In Telofofo River Basin the coconut area extends about one third the way down from Ferm Dam. Below this is swamp forest.

Elumping is evident below all erosion spars on any sort of elope in volcanic part.

In Dan Dan (Unrtiner Pasture) all the drainage runs wast from the Western scarp or series of erseion scars.

In the southeast corner of the island is much Dimeria grassland.

The terrace forests north of Talofofo to

Togcha should be indicated as good limestons ##

forest on my vegetation map. This plea

reaches down from the north to the north

side of Page Bay.

The plateau east of Marca has large numbers of dead trees. The forest just south of Anderson A.T.R. seems almost entirely dead. Seet and north or Anderson it seems in fairly good shape, quite pour west of Anderson. The only good patch in the extreme north part of the Loop is apposite the east end of Taragua Beach. Good forest north of Northwest Field seet of Ritidian Foint. There is good forest just west of Intaguac Hill. The grassy area on Mataguac is smaller than on my veg. mag.
